Comparative Performance Insights of Zomato, Swiggy & Dunzo
across 7 cities · 100 restaurants · 24.36M in revenue

Zomato

India's largest food delivery platform.
9,339 orders · 8.10M revenue
· 33.5% market share

Swiggy

Market leader by volume & revenue.
9,469 orders · 8.27M revenue · 33.8% market
share

Dunzo

Highest customer ratings.
9,192 orders · 8.00M revenue · 32.8% market
share

INTRODUCTION

The objective of this project was to develop a comprehensive **Food Delivery Business Analytics Dashboard** that provides a centralized view of business performance across multiple delivery platforms including **Zomato, Swiggy, and Dunzo**. This project was designed as an end-to-end **Business Intelligence and Data Analytics solution** to help stakeholders monitor revenue performance, customer behavior, restaurant performance, operational efficiency, and sales trends through interactive and data-driven visualizations. The project was created using a structured analytics approach where raw business data was collected, cleaned, transformed, and modeled into meaningful insights. We developed multiple analytical dashboards such as **Executive Overview, Customer Analytics, Restaurant Analytics, Sales Trends, and Platform-wise Performance Analysis** to provide decision-makers with a detailed understanding of business operations and performance metrics. The dashboards were designed with a stakeholder-focused approach to ensure insights are visually clear, interactive, and easy to interpret for strategic decision-making.

To build this project, we used several industry-standard tools and technologies. The primary visualization and reporting tool used was **Power BI**, which enabled us to create dynamic dashboards and interactive business reports. Data preparation and transformation were performed using **Power Query**, while data relationships and business calculations were handled through **Data Modeling** techniques. Advanced business metrics and calculations such as revenue analysis, profit margins, average order value, customer segmentation, and operational KPIs were created using **DAX Measures**. Additional analytical thinking and visualization design principles were also applied to make the dashboards more insightful and business-oriented.

Throughout this project, several analytical and technical skills were applied including :-

- **Power BI Dashboard Development**
- **Data Cleaning & Transformation**
- **Data Modeling & Relationship Building**
- **DAX Calculations & KPI Creation**
- **Business Intelligence & Data Visualization**
- **Analytical & Problem-Solving Skills**
- **Business Performance Analysis**
- **Stakeholder Reporting & Dashboard Design**

Additionally, the project helped in answering important business questions such as :-

- **Which delivery platform contributes the highest revenue?**
- **Which cuisines and restaurant types perform best?**
- **Which customer segments generate maximum revenue?**
- **Which cities drive the highest order volume and sales?**
- **How do delivery time and operational efficiency impact customer satisfaction?**
- **What operational issues are affecting customer experience and retention?**

Total Revenue (by Month)

Revenue Distribution (by Delivery Partners)

Revenue Distribution (by Order Status)

Key Insights

Pizza is the top performing cuisine with 5.1M revenue.

Delhi generated the highest revenue of 42.07M with 33.13% success rate.

Swiggy has the highest revenue share among the three delivery partners.

EXECUTIVE OVERVIEW DASHBOARD SUMMARY

- Total Revenue Generated : **24.36M**
- Total Orders Processed : **28K**
- Total Profit Earned : **20.17M**
- Profit Margin : **82.78%**
- Average Delivery Time : **52.7 Minutes**
- Major Challenge : **High Returned Orders & Low Ratings**

Key Insights :-

- The business generated total revenue of **24.36M** with **28K** total orders.
- Profit margin stands at **82.78%** , indicating highly profitable operations.
- Pizza is the top-performing cuisine with **5.1M** revenue contribution.
- **Delhi** generated the highest revenue among all cities.
- **Swiggy** contributed the highest revenue share among delivery platforms.
- Average customer rating remains low at **2.99** , highlighting customer satisfaction concerns.
- Returned orders exceeded delivered orders , indicating operational inefficiencies.

REVENUE BY RESTAURANT TYPE

The chart compares revenue generated across different restaurant categories :

- Casual Dining : **6.8M**
- Cloud Kitchen : **5.9M**
- Fine Dining : **5.8M**
- Quick Service : **5.8M**

- **Insight :-**

Casual Dining generated the highest revenue at 6.8M. Cloud kitchens also performed strongly, reflecting increasing customer preference for online-only food businesses.

- **Recommendation :-**

- 1 - Expand partnerships with high-performing casual dining brands.
- 2 - Invest more in cloud kitchen collaborations.
- 3 - Offer loyalty programs for repeat customers.

REVENUE BY CUISINE

The chart compares revenue generated across different cuisine :

- Pizza : **5.1M**
- Desserts : **3.9M**
- South Indian : **3.2M**
- Café : **2.9M**
- North Indian : **2.7M**
- Biryani : **2.5M**
- Fast Food : **2.4M**
- Chinese : **1.8M**

- **Insight :-**

Pizza emerged as the top-performing cuisine with 5.1M revenue, followed by Desserts at 3.9M. Chinese cuisine contributed the lowest revenue.

- **Recommendation :-**

- 1 - Promote combo offers with pizza and desserts.
- 2 - Expand high-demand cuisines in underperforming cities.
- 3 - Introduce regional cuisine campaigns.

CITY-WISE SALES PERFORMANCE ANALYSIS

City Performance Overview :-

City-wise Sales Details						
City	Total Revenue	Total Orders	AOV	Success Rate %	Avg Del Time	
Bangalore	25,63,984.28	2978	860.98	33.85%	52.8 min	
Chennai	36,16,609.02	4179	865.42	33.19%	52.6 min	
Delhi	42,07,681.30	4815	873.87	33.13%	52.7 min	
Hyderabad	40,24,537.35	4639	867.54	32.12%	52.4 min	
Kolkata	32,70,786.75	3731	876.65	33.32%	52.4 min	
Mumbai	41,16,676.65	4760	864.85	33.76%	52.8 min	
Pune	25,64,264.91	2898	884.84	32.16%	53.1 min	

Insight :-

Delhi is the top-performing city in terms of revenue generation and order volume. This indicates stronger delivery efficiency and operational management.

Average delivery time remains around 52–53 minutes, suggesting standardized operations. Metro cities are driving the majority of revenue and orders.

Recommendation :-

- Focus marketing campaigns in lower-performing cities.
- Optimize delivery operations in cities with lower success rates.
- Introduce city-specific promotional strategies.

MONTHLY REVENUE TREND

The monthly trend shows :

- Strong revenue performance during January to March
- Sharp decline in April
- Stable but lower performance from May to November
- Slight recovery in December

- **Insight :-**

Revenue peaked during the first quarter and declined sharply in April. The business later stabilized with slight recovery in December.

- **Recommendation :-**

- 1 - Run aggressive campaigns during low-performing months.
- 2 - Launch seasonal offers and subscription plans.
- 3 - Analyze reasons behind April decline.

DELIVERY PARTNER ANALYSIS

Revenue share by delivery platforms :-

- Swiggy : 33.96%
- Zomato : 33.22%
- Dunzo : 32.82%

- **Insight :-**

Swiggy contributed the highest revenue share. Revenue contribution remains balanced across all delivery partners.

- **Recommendation :-**

- 1 - Strengthen partnerships with top-performing delivery partners.
- 2 - Analyze customer behavior across platforms.
- 3 - Introduce platform-specific campaigns.

ORDER STATUS ANALYSIS

Order status contribution :-

- Returned : 33.81%
- Cancelled : 33.15%
- Delivered : 33.03%

- **Insight :-**

Returned orders exceeded delivered orders, indicating operational inefficiencies and customer experience challenges.

- **Recommendation :-**

- 1 - Improve delivery tracking systems.
- 2 - Strengthen restaurant quality checks.
- 3 - Improve order accuracy.
- 4 - Reduce delivery delays.

Order Volume (by Cities)

SALES TREND DASHBOARD ANALYSIS

Key Insights :-

- Revenue peaked during January and December due to seasonal demand.
- A sharp decline was observed in April 2024.
- Delhi and Mumbai recorded the highest order volumes.
- Revenue stabilized after April with consistent monthly performance.
- The business heavily depends on metro city demand.

Order Volume (by Cities)

Revenue & Order Volume (by Months)

OVERALL BUSINESS INSIGHTS

Major Positive Findings :-

- Strong total revenue generation of 24.36M
- High profitability with 82.78% profit margin
- Balanced contribution across restaurant types and delivery partners
- Strong demand for pizza and dessert categories
- Metro cities driving healthy order volumes

Major Challenges Identified :-

- Low customer satisfaction rating (2.99)
- High delivery time (52.7 minutes)
- Returned orders exceeding delivered orders
- Significant revenue decline after March
- Operational inefficiencies affecting success rates

STRATEGIC RECOMMENDATIONS

Customer Experience Improvements :-

- Improve delivery speed and order tracking
- Enhance customer support responsiveness
- Introduce quality assurance checks for restaurants
- Reduce order cancellation rates

Revenue Growth Strategies :-

- Promote top-performing cuisines such as pizza and desserts
- Introduce festive and seasonal campaigns
- Expand cloud kitchen partnerships
- Use personalized recommendations and loyalty programs

Operational Optimization :-

- Implement route optimization for deliveries
- Increase staffing during peak hours
- Monitor city-wise operational performance
- Analyze reasons for returned orders

Market Expansion Strategies :-

- Increase penetration in lower-performing cities
- Launch city-specific marketing campaigns
- Collaborate with premium restaurant brands
